

# COMPATIBILITÉ DES ROUES DE VÉLOS DE COURSE TUBELESS TESTÉE PAR SCHWALBE

## CATÉGORIES D'ÉVALUATION

### Montage

Est-il facile de monter un pneu de vélo de course Schwalbe ?

### Gonflage

Est-il facile de gonfler le pneu ? Une pompe à air est-elle suffisante ou a-t-on besoin d'un compresseur ou d'un Tire Booster ?

### Risque de déjancer

La sécurité est un thème qui nous tient particulièrement à cœur. C'est donc pour cette raison que les exigences que nous imposons à la combinaison pneu/roue sont extrêmement élevées en termes de sécurité et que nous procédons à des tests avec des tolérances de sécurité élevées. Certaines roues n'atteignent pas le niveau de sécurité que nous fixons pour nos tests. Ces roues peuvent toutefois convenir pour l'utilisation Tubeless si l'on prend en compte la pression de gonflage maximale indiquée par le fabricant des roues. Ces pneus ne doivent pas être gonflés à la pression maximale figurant sur le pneu.

**Observer impérativement les recommandations des fabricants de roues**

1 Toujours gonfler sans insert de valve

2 Jante non soudée : au moins 30 ml de liquide anti-crevaison DocBlue sont nécessaires pour la conversion. Étanchéité garantie uniquement avec 30 ml de liquide anti-crevaison DocBlue

3 UST: Pas Fond de Jante nécessaire

### Important:

■ Les résultats des tests concernent uniquement le montage avec des pneus Tubeless de Schwalbe et ne sont pas applicables à d'autres marques de pneus.

■ Il s'agit de procédures de test réalisées en interne par Schwalbe. Le résultat ne constitue pas une homologation officielle.

■ La liste est mise à jour régulièrement.
