

NEW - SCHWALBE MARATHON PLUS TOUR

FRESH DESIGN

Improved tread design for the all-rounder. The Marathon Plus Tour has been given a completely new look. As the gritty brother of the Marathon Plus, the Tour version is an all-rounder and inspires with its wide range of use from everyday to long-distance touring, on asphalt or in medium-difficulty terrain. In addition to the look, the portfolio is expanded to include modern e-bike sizes.

Schwalbe stands with its Marathon line for the highest quality characteristics: enormous durability, very high puncture protection and excellent everyday suitability. The 'Flat-less' tires have been an endurance runner for more than ten years.

Through a three-layer sidewall, the Marathon Plus Tour in the e-bike version is now even more load-bearing and resistant to damage. This means that even more payload is possible on the e-bike.

With its distinctive tread design, the Marathon Plus Tour fits perfectly with modern trekking, SUV and e-bikes. Thanks to the large center blocks, it rolls smoothly, the robust shoulder lugs give good grip and traction on unpaved surfaces.

The Marathon Plus Tour is available in two versions optimized for the type of bike. The e-bike version with proven Addix-E compound construction and for non-motorized bikes there is the proven Marathon Plus construction version with the Addix compound. All tires have reflective stripes and the certified approval for fast e-bikes up to 50 km/h (ECE-R75).
